

## Ultra Jet DLE-LH – the Marabu alternative to Mimaki LH-100 ink

Ultra Jet DLE-LH combines UV-LED curing, exceptional versatility, and high lightfastness – available as a complete, ready-to-run solution including LH-100 chip.

### Application field

The LED-curable Ultra Jet DLE-LH is suitable for printhead technologies such as

- Ricoh Gen 3
- Ricoh Gen 4
- Ricoh Gen 5
- Toshiba Tec CA4
- Konica Minolta 512 + 1024 + iSeries
- Dimatix Q-Class
- Xaar 1001

### Range

1 l bottle and 600 ml bag

- **170** White
- **428** Yellow
- **438** Magenta
- **459** Cyan
- **489** Black
- **910** Varnish

Properties	DLE-LH	OEM
Variety of substrates	+++	++
Flexibility	+++	-
Adhesion	+++	++

### Your benefits

#### Complete solution

Ultra Jet DLE-LH is supplied in the appropriate packaging, including an LH-100 chip, and is ready for immediate use.

#### Excellent adhesion to many substrates – including demanding materials

Outstanding on PMMA, PP/PE, PC, PET, and more, enabling a broad range of applications. For further substrates, see Technical Data Sheet.

#### Highly suitable for further processing

Milling, drilling, bending, and more: the ink film remains stable and does not chip or crack.

#### High-quality pigmentation

Ideally suited for outdoor applications.
